Prototype 2 – Treefender

Treefender game is a game where there is a tree in the middle. The player must kill the enemy by clicking the left mouse so that the tree remains safe. Since the tree is us, how do we protect the tree from enemies coming from all directions

Prototype 3 – Popper

Game Popper is where the weapon consists of 2 different pivots. To shoot an existing enemy, the player uses the cursor up and down to move the lower arm and the left and right cursor to use the upper arm. For the upper arm it will be slower than the lower arm. To shoot the player press the spacebar button.

Prototype 4 – Castle Mathia

Castle Mathia game is a math game for guarding a castle. There will be questions randomly added less times and divided so that the player must click the correct number for the answer that is right above the enemy, if the player presses the wrong answer the castle will be shot.
